

What is claimed is:

1           1.       A method of using a terminal having a display, said method comprising:  
2           accessing a first application using said terminal;  
3           displaying said first application on said display; and  
4           displaying features of said first application within a first active window of said terminal.

1           2.       The method of claim 1, wherein said displayed features of said first application  
2           comprise a visual representation of said first application.

1           3.       The method of claim 2, wherein said displayed features further comprise a URL  
2           link of said first application when the first application is a browser for internet browsing.

1           4.       The method of claim 1, wherein said displayed features of said first application  
2           is one of a plurality of system services applications.

1           5.       The method of claim 4, wherein said system service application is one of a  
2           calendar, an e-mail and a notice board.

1           6.       The method of claim 1, further comprising:  
2           accessing a second application using the terminal; and  
3           displaying said second application on said display while said features of said first  
4           application are displayed within said first active window of said terminal.

1           7.       The method of claim 6, further comprising displaying features of said second  
2           application within a second active window of said terminal while displaying said features of the  
3           first application within said first active window.

1           8.       The method of claim 6, wherein the second application is a browser for internet  
2           browsing.

1           9.     The method of claim 6, wherein the second application is one of a plurality  
2 of system service applications comprising a calendar, an e-mail and a notice board.

1           10.    The method of claim 1, further comprising:  
2 selecting said first active window;  
3 reaccessing the first application after selecting said first active window; and  
4 displaying said first application on said display after selecting said first active window.

1           11.    The method of claim 1, further comprising relocating a position of said first  
2 active window within said display.

1           12.    A method of using a terminal having a display, said method comprising:  
2 displaying features of a first application within a first window on said display; and  
3 displaying features of a second application within a second window on said display.

1           13.    The method of claim 12, wherein said displayed features of said first  
2 application comprise a visual representation of said first application.

1           14.    The method of claim 13, wherein said displayed features further comprise a  
2 URL link of said first application when the first application is a browser for internet browsing.

1           15.    The method of claim 13, wherein said displayed features further comprise a  
2 partial view of the first application.

1           16.    The method of claim 12, further comprising:  
2 selecting said first window;  
3 accessing said first application after selecting said first window; and  
4 displaying said first application on said display after selecting said first window.

1           17.    The method of claim 16, further comprising:  
2 selecting said second window subsequent to displaying said first application;

3 accessing said second application after selecting said second window; and  
4 displaying said second application on said display after selecting said second window.

1 18. The method of claim 16, wherein the first application is one of an internet  
2 browser, a calendar, an e-mail and a notice board.

1 19. The method of claim 16, wherein the second application is one of an internet  
2 browser, a calendar, an e-mail and a notice board.

1 20. A terminal for accessing an application comprising:  
2 a browser that accesses at least a server;  
3 a display device coupled to the browser to display a view of said first application; and  
4 a user interface device coupled to the display device that allows a user to interact with  
5 items displayed on said display device, the display device to display features of said first  
6 application within a first active window of said display device.

1 21. The terminal of claim 20, wherein said displayed features of said first  
2 application comprise a visual representation of said view of said first application.

1 22. The terminal of claim 21, wherein said displayed features further comprise a  
2 URL link of said first application when the first application is a browser for internet browsing.

1 23. The terminal of claim 20, wherein said displayed features are one of calendar,  
2 e-mail and notice board for said first application.

1 24. The terminal of claim 20, wherein said browser accesses a second application  
2 and said display device displays a view of said second application while said features of said  
3 first application are displayed within said first active window.

1           25.     The terminal of claim 24, wherein said display device displays features of said  
2 second application within a second active window while displaying said features of the first  
3 application within said first active window.

1           26.     The terminal of claim 20, wherein said user interface device is used to select  
2 said first active window, said browser reaccessing the first application based on said selection,  
3 and said display device displays said view of said first application after said selection of said  
4 first active window.

1           27.     The terminal of claim 20, wherein said user interface device allows a user to  
2 relocate a position of said first active window within said display device.

1           28.     A terminal for accessing application services, said terminal comprising a display  
2 device and a controller coupled to said display device so as to control items displayed on said  
3 display device, said controller to display features of a first application within a first window on  
4 said display device and said second controller to display features of a second application  
5 within a second window on said display device.

1           29.     The terminal of claim 28, wherein said displayed features of said first  
2 application comprise a visual representation of said first application.

1           30.     The terminal of claim 29, wherein said displayed features further comprise a  
2 URL link of said first application when the first application is a browser for internet browsing.

1           31.     The terminal of claim 28, wherein said displayed features comprise one of  
2 calendar, e-mail and notice board for said first application.

1           32.     The terminal of claim 28, further comprising a user interface device to allow a  
2 user to select said first window, wherein said controller uses a browser to access said first  
3 application after selecting said first window and said display device displays said first  
4 application after selection of said first window.

1           33     The terminal of claim 32, wherein said user interface device allows a user to  
2     select said second window subsequent to said display device displaying said first application,  
3     wherein said controller uses a browser to access said second application after selecting said  
4     second window and said display device displays said second application after the selection of  
5     said second window.
